

For the attention of:

EME 2028 Conference
Organizing Committee
Lisbon
Portugal

Subject: Letter of Support to the Bid Committee for the Portuguese Organization of the EME 2028 International Conference.

Dear Sirs

Dear EME 2028 Conference Organizing Committee,

As President of the Instituto Superior Técnico/University of Lisbon (IST/ULisboa), I hereby express our support for the Committee that proposes to organize the EME 2028 International Conference in Lisbon.

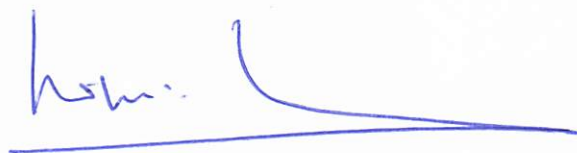

IST, the school of engineering of the University of Lisbon, one of Europe's most reputed engineering schools, has a long tradition of excellence in science, technology, and innovation, including renowned research in the fields of telecommunications, microwave engineering, and space-related technologies. We acknowledge the importance of the Earth-Moon-Earth (EME) community as a meeting point for advanced engineering, experimentation, and international collaboration.

As such, IST is looking to collaborate, both by fostering connections with the academic and research community and by facilitating technical visits and promoting the dissemination of knowledge and innovation related to the conference topics.

Hosting EME 2028 in Lisbon represents an exceptional opportunity to bring together researchers, radio amateurs, and experts in an environment that combines technical expertise with global accessibility.

I am confident that the proposed organizing team will deliver an exceptional event, reinforcing the global impact and continued growth of the EME community.

Yours faithfully,

Prof. Rogério Colaço

President of Instituto Superior Técnico
